## MTG-MTG2619

## MTG-MTG1920

Note: There is a possible deviation of  $\pm 20\%$  in the above load/deflection graphs due to production and hardness tolerances

## Mountings Cut From Rail

It is possible to Manufacture Mountings from Rail as illustrated. The rail can be supplied as manufactured in 2 metre lengths, or can be cut and drilled to meet the customer's individual requirement. This process has the added advantage that no tooling is normally required.

## Side Bearer Mountings

A range of sizes and styles is available from existing tooling. Some parts may be available from stock although they are normally manufactured to meet customers' requirements.
